**BUSINESS OPERATIONS
POLICY TO REDUCE WASTE &
RECYCLE RIGHT!**

**STAR
ENGINEERING
INC.**

Combining Tradition, Experience, Innovation and Quality

STAR Engineering Inc. is a prominent manufacturer of custom-built automated transfer cars for moving kiln cars in the brick, tile & ceramic industry.

STAR Engineering combines the old with the new – old fashioned quality and expertise with new innovation and design technology.

They do business around the world, including India, China, Russia, Japan and Egypt.

STAR makes every effort to divert waste on the shop floor and in their office. *Reusing what they can, as well as recycling!*

Recycling: Old corrugated cardboard- invested in baler to be more efficient in managing the volume of cardboard they deal with on a daily basis; Scrap metal goes to Muskingum Iron & Metal; Shop and office recycles cans, ink cartridges and batteries.

Reusing: Shop reuses incoming pallets for outgoing shipments, reusing bubble wrap and packing peanuts as well; Shop recovers all coolant possible; Office uses washable drinking cups and travel mugs, opting for tap water instead of single use plastic bottles; and most pack their lunches with very little disposable packaging; In 2018 STAR installed 72 solar panels and transferred to all LED lighting, saving STAR \$500 a month so far! They generate enough electricity now to power one of the shop buildings with solar power. At this rate, they can recoup the investment in going solar within 4-5 years!

**We commend STAR Engineering Inc.
A SMART & GREEN BUSINESS!**

~ choose to reuse... then recycle right!

Perry County Recycling Center is based in New Lexington, open 7:30 am-3:30pm Monday-Friday for residents and businesses; drop off the following items accepted for recycling:

cardboard, office paper, newspaper, magazines, aluminum cans, steel food cans, #1 & #2 plastics like pop bottles and milk jugs, clear & brown glass bottles and jars.

Over 21 recycling sites located throughout Perry County for 24-7 drop-off!

KUDOS to all our Businesses & Community members for doing what you can to divert unnecessary waste from the landfill!

Ohio Materials Marketplace — Year One Report

Businesses!
Consider joining Ohio Materials Marketplace!
You may find it quite useful!

Summary

On April 4, 2017, Ohio EPA Director Craig W. Butler announced the launch of a new online service where Ohio businesses, not-for-profits and government organizations could advertise and acquire potentially useful products and materials that might otherwise be destined for disposal in landfills. The new Ohio Materials Marketplace (OMM) was offered as a free online platform allowing these organizations to connect and find solutions to material reuse and recycling needs.
