

Ohio's Vaccination Program

Phase 1B

Ohioans born with or who have early childhood conditions that are carried into adulthood, which put them at higher risk for adverse outcomes due to COVID-19.

The following group of Ohioans are included, even though they are not age 65 and older, because they were born with or developed in childhood a severe condition that puts them at very high risk for dying from COVID-19.

- Sickle cell anemia
- Down syndrome
- Cystic fibrosis
- Muscular dystrophy
- Cerebral palsy
- Spina bifida
- People born with severe heart defects requiring regular specialized medical care.
- People with severe type 1 diabetes, who have been hospitalized for this in the past year.
- Phenylketonuria (PKU), Tay-Sachs and other rare, inherited metabolic disorders.
- Epilepsy with continuing seizures; hydrocephaly; microcephaly; and other severe neurological disorders.
- Turner syndrome, fragile X syndrome, Prader-Willi syndrome, and other severe genetic disorders.
- People with severe asthma, who have been hospitalized for this in the past year.
- Alpha and beta thalassemia
- Solid organ transplant candidates and recipients.

COVID - 19 | Key Indicators

Last Updated: 02-18-21

All dates are based when an indicator is reported and will not match data in other COVID-19 dashboards provided by the Ohio Department of Health. All other dashboards are based on onset date, date of hospitalization, or date of death.

Note: Totals include Confirmed and CDC Expanded Case Definition (Probable)

The Bureau of Infectious Diseases and the Bureau of Vital Statistics continue to reconcile death data. This process is ongoing as the teams complete a deep review of the data. This review will result in some fluctuations in death numbers moving forward.

Department of Health

All 88 Ohio Counties Ranked by Highest Occurrence COVID-19 Cases

The 14-day period used for this table covers data from Feb. 03 to Feb. 16. The data were pulled on Feb. 17 and exclude incarcerated individuals.
Shaded counties meet the Centers for Disease Control and Prevention definition of "high incidence" of COVID-19.
